A fitter in the ITI context is responsible for assembling, installing, maintaining, and repairing machinery and equipment. The role demands a good grasp of mechanical concepts, precise measurement skills, and the ability to work with various tools and machines.

Having this foundational knowledge will not only help you answer technical questions but also demonstrate your enthusiasm and readiness for the job during the interview.

Technical Interview Questions and Answers for Fitter ITI

1. What are the different types of fitting tools you have worked with?

A common question aimed at gauging your practical exposure. An effective answer would be:

In my ITI training, I have worked extensively with fitting tools such as hammers, files, chisels, hacksaws, screwdrivers, and measuring instruments like vernier calipers and micrometers. I am comfortable using these tools to perform tasks like cutting, shaping, and assembling components.

This answer shows familiarity with essential tools and hands-on experience.

2. Can you explain what a vernier caliper is and how it is used?

This question tests your knowledge of precision measuring instruments.

A vernier caliper is a measuring instrument used to measure internal and external dimensions as well as depths with high accuracy. It consists of a main scale and a sliding vernier scale that helps read measurements up to 0.02 mm or 0.01 mm. Interviewers want to assess your problem-solving skills.

If a machine isn't working properly, I first stop the operation to avoid any damage or accidents. Then, I conduct a thorough inspection to identify the fault, checking for loose parts, wear and tear, or lubrication issues. After diagnosing the problem, I either fix it myself if it's within my capability or report it to the senior technician. I also document the issue to prevent future occurrences.

This answer showcases a systematic approach and awareness of safety.

5. Describe a situation where you had to work under pressure. How did you manage?

This question evaluates your ability to stay calm and efficient.

During my training, there was a time when we had to complete fitting work on a tight deadline. This experience taught me the importance of teamwork and time management under

pressure.?
