Techniques and Tools for Arabic Mehendi Application

Application Tools

Traditional mehendi application involves:

- Henna cones: The primary tool, crafted from cloth or plastic with a fine tip for detailed work.
- Stencils: Used by some artists for consistency and quick application.
- Brushes and toothpicks: For intricate detailing or touch-ups.

Modern artists also utilize:

- Squeeze bottles: For more controlled flow.
- Pump applicators: To achieve uniform lines.

Preparation and Application Process

The process of creating Arabic mehendi designs involves several steps:

- Design Selection: Clients choose or customize patterns based on occasion and personal preference.
- Skin Preparation: Clean, dry skin ensures better henna adherence.

- Henna Paste Application: Using cones or applicators, the artist meticulously traces the design, emphasizing bold outlines and spacious elements.
- Drying and Setting: The henna is allowed to dry for several hours, often with the application of lemon-sugar solutions to deepen color and improve stain quality.
