ICC PLAN REVIEW CHECKLIST Updated Version

icc plan review checklist

When undertaking construction projects, whether residential, commercial, or industrial, ensuring compliance with building codes and standards is paramount. The International Code Council (ICC) provides a comprehensive framework through its model codes, which serve as the basis for local building regulations across many jurisdictions. An ICC plan review checklist is an essential tool for architects, engineers, plan reviewers, and code officials to systematically evaluate construction plans to verify they meet all applicable codes and standards before construction begins. This article explores the critical components of an ICC plan review checklist, detailing the steps and considerations necessary for a thorough evaluation.

Understanding the Purpose of an ICC Plan Review Checklist

What is an ICC Plan Review Checklist?

An ICC plan review checklist is a structured document that outlines all the critical elements to be examined during the review of building plans. Its primary purpose is to ensure that proposed construction documents conform to the relevant ICC model codes, such as the International Building Code (IBC), International Residential Code (IRC), International Fire Code (IFC), and others. By following a standardized checklist, reviewers can identify potential code violations, safety concerns, or design issues early in the process, reducing costly modifications during construction.
