Breaking Down Common ITEC Makeup Question Themes

To prepare effectively, it's helpful to categorize the types of questions you might encounter during your ITEC makeup assessments.

Skin Types and Conditions

One frequent topic involves identifying different skin types (oily, dry, combination, sensitive) and conditions (acne, rosacea, eczema). Questions may ask how these affect your choice of products and techniques. For example, you might be asked:

How would you adapt your makeup application for someone with sensitive skin?

What products should be avoided for acne-prone skin?

Understanding this helps you demonstrate your ability to customize your makeup approach for individual clients.

Makeup Products and Tools

ITEC exams test your knowledge of the tools of the trade, from brushes to sponges, and the products you use. You may need to explain:

The difference between cream and powder foundations.

How to select appropriate makeup based on skin tone and texture.

The role of primers and setting sprays in enhancing makeup longevity.

Being familiar with both professional and commercial products is advantageous, as questions may also touch on ingredient safety and allergen awareness.

Techniques and Application

Practical skills form a large part of the makeup exam. Theoretical questions might probe your understanding of contouring angles, blending methods, or lash application. For example:

Describe the steps involved in creating a smokey eye look.

How do you ensure symmetry when applying eyeliner?

These questions assess not only your knowledge but also your attention to detail and artistic sense.

Health, Safety, and Hygiene

No beauty exam is complete without questions on maintaining a safe and hygienic working environment. Expect inquiries about:

Proper sanitation of brushes and tools.

How to handle accidental contamination.

Understanding contraindications like infections or allergies.

Demonstrating your commitment to client safety is vital both for passing the exam and for building a trustworthy reputation in the industry.
