Hepta- (7)

7.

Octa- (8)

8.

Nona- (9)

9.

Deca- (10)

10.

For example, CO is carbon monoxide (not monocarbon monoxide), and CO? is carbon dioxide. Pay attention to these details when forming unit 6 4 molecular compounds answers related to naming.

Writing Molecular Formulas

Another crucial part of the unit involves writing the correct molecular formulas based on the names or vice versa. This requires knowing the element symbols from the periodic table and applying the correct pre?xes to determine the number of atoms.
